## SALVATION ARMY IS UNDER NEW RULES

Los Angeles, Cal., Oct. 21.—The Salvation Army, which incorporated Monday under California laws, does not thereby meet the demands of the Municipal charities commission of Los Angeles, it was announced today.

Dr. Milbank Johnson, head of the commission, said that all the directors must be approved by Los Angeles business men, while those named include only one resident here.

In addition the commission insists that the moneys collected shall be retained in the city with the exception of those collected for foreign missions.

The Salvation Army officers have so far refused to have their corporation controlled by other than organi-

## MILITANCY NOT POPULAR IN ENGLAND, CHRISTABEL VISITS U. S.; WILL BE GOOD

Christabel Pankhurst, photographed since her arrival in U. S.

Christabel Pankhurst, the famous English suffragette, slipped into New York the other day without anyone's knowing it. Militancy having been temporarily abandoned in England, she decided to put in her time lecturing in the United States. She promises to be good, so no one need take to the storm cellar.

zation members. They also claimed the right to send out of the city certain funds collected for religious purposes to meet the overhead expense of the national body. They maintain that the commission has no jurisdiction over money knowingly contributed for such a purpose.

Recently the commission caused the arrest of the managers of the industrial stores, where the books, clothing and other articles contributed by the public were sold for the maintenance of local institutions and homes. The cases are now pending, the demurrer of the Salvation Army attacking the constitutionality of the committee having been overruled by the trial court.

### SUGAR BEET SEED OF UTAH UNEQUALLED

Salt Lake, Oct. 21.—Utah sugar beet seed is the equal, if not the superior, of any that has ever been planted in the state, according to experiments conducted this year in the Cache valley, is the opinion of R. W. Eardley, secretary of the Manu-

facturers' association, who returned yesterday from Logan.

For some time there has been a fear that there would be a dearth of sugar beet seed for next year's planting, as most of the seed heretofore has come from Germany. About 1500 pounds of Utah seed was planted last spring and the beets raised are the finest ever handled at Utah mills, it is declared.

Officials of the Utah Agricultural college have for several years endeavored to induce the farmers in the Cache valley to give the Utah seed a trial, but met with indifferent success until last spring. There is enough seed now on hand at the Agricultural college to meet the demands of the entire state next year.

Mr. Eardley reports that the four knitting mills at Logan are working full capacity and all have orders for weeks ahead. The Logan merchants and manufacturers have agreed to cooperate in the Utah Products week movement and a meeting has been called to work out the details of the plan.

## PRODUCTION OF HIGH EXPLOSIVES IN U. S.

Washington, Oct. 21.—Production of explosives in the United States in 1913 amounted to 463,514,881 pounds, according to the federal bureau of mines today. This represents a decrease over 1912 of 36,146,622 pounds of black powder, and an increase of 7,212,872 pounds of high explosives and 3,055,590 pounds of "permissible" explosives.

"Permissible" explosives were originated by the bureau and represent explosives that have passed certain safety requirements. The use of "permissible" explosives in dangerous mines had been advocated by the bureau which expresses gratification at their increased use. In 1912 production of such explosives for the mines amounted to 11,300 pounds against 21,804,285 pounds used in 1913.

## WHY JAP CRUISER WAS BLOWN UP

Peking, Oct. 21, 7:15 p. m.—An official German report on the blowing up of the Japanese cruiser Takachihio in Kiao Chow harbor, the night of October 17, sets forth that the German torpedo boat S-90 went to sea with the intention of attacking a larger cruiser. Failing in this, she had to content herself with the Takachihio.

As soon as this vessel had been disposed of the S-90's crew found their boat trapped and ran her on the beach. The men got safely ashore. The Japanese legation here says that the work of mounting the siege guns before Tsing Tau has not yet been completed and that the bombardment of Tsing Tau probably will be delayed for several weeks.

Dispatches from Tokio yesterday said the S-90 was found ashore and destroyed by the Japanese sixty miles south of Tsing Tau.

## CAPTAIN TELLS OF HIS CAPTURE

German Submarine Takes  
British Steamer and Crew  
—Sink the Ship.

London, Oct. 21, 8:50 a. m.—Captain Johnson and 16 men of the crew of the British steamer Glitra, of Leith, which was sunk by a German submarine, have arrived in Stavanger, Norway, from Skudenes, according to a dispatch to the Reuters Telegram company from that place. In telling of his experience Captain Johnson said:

"The Glitra left Grangemouth, Scotland, Sunday noon with coal and coke for Stavanger. At half past twelve Tuesday afternoon the German submarine N-17 popped out of the water at the starboard and stopped us, about nine miles southwest of Skudenes. No other craft was in sight.

"The submarine sent a boat aboard with five men. With revolvers in hand they ordered the English flag taken down, threatening to shoot me if I did not obey. Furthermore they allowed me not more than ten minutes to let down the life boats and take off the crew.

"I tore down the flag, whereupon the German officer tore it out of my hands and trampled it under foot. I was forced to take the ship's papers back when I attempted to take them off and none of the crew was allowed to take any of his belongings.

"The crew went in two life boats which the submarine quickly towed give hundred yards from the Glitra. Three Germans remained aboard, searched the ship thoroughly and rapidly, and one of them evidently opened the bottom valve, because the rear of the ship began to sink. Then in a few minutes the Glitra disappeared quietly.

"We were ordered to row to the shore. When we reached Norwegian sea territory we met a pilot boat which towed us until a Norwegian torpedo boat took us aboard. The Glitra was not insured."

## PROTEST AGAINST OLEOMARGARINE TAX

Chicago, Oct. 21.—Resolutions protesting against the government tax on oleomargarine were adopted at the closing session of the American Meat Packers' association convention here today.

Congress was asked to repeal the tax or reduce it as oleomargarine, the resolutions pointed out, is the only "whole food necessity which is taxed and the rising cost of living makes it necessary to reduce the cost to the consumer."

A resolution protesting against the railroad switching charge, which it was asserted, placed an added burden on meat cost, also was adopted.

Officers were elected as follows: President, John J. Felin, Philadelphia; vice president, Howard R. Smith; secretary, George L. McCarthy, New York City; treasurer, Max N. Agger, Cincinnati.

**SUITABLE FLOWERS.**  
"The young lady has many admirers. I wish to send her some flowers that will cause her to keep me in mind while she's away."  
"Well, there's rosemary," said the dealer reflectively. "That's for remembrance. Or you might send her some forget-me-nots."

**AIMING TOO HIGH.**  
Said man: "I think our janitor admires our daughter May. He'd be a catch and such a match. You don't see every day."  
Quoth pa: "Such hopes are foolish. There's bound to be a fluke. You run, it seems, to idle dreams. Last week it was a duke."

## FRENCH DERANGE GERMAN PLANS

Occupation of Ostend of Little  
Strategic Importance—Dunkirk a Dangerous Point.

London, Oct. 21, 4:55 a. m.—The correspondent of the Times in northern France, in showing how the German plans have been deranged by the strong pressure of the allies on the left says:

"The occupation of Ostend had little strategic advantage. Dunkirk is strongly fortified and an attempt to move on it would be dangerous to the Germans while Calais is well able to look after itself. The fighting line daily has undergone variations which were totally undesigned."

"The Teutonic affection for the occupation of open towns belonging to the enemy has led them into greater difficulties than the temporary advantages in the matter of food and lodging afforded them. It is only fair to say, however, that so far as I have been able to gather, the Germans behaved well in most of the places that they recently visited. Indeed, in one case a fine imposed on the inhabitants was returned upon evacuation as a token of the hospitality shown to the German troops."

## WAR STOPS IMPORT OF BLOODED HORSES

Washington, Oct. 21.—The European war has virtually placed an embargo on the importation into the United States of pure blooded draft horses for breeding purposes, but the standard of draft horses in America will not suffer as a consequence, in the opinion of department of agriculture experts today. According to the department's experts, there is sufficiently large amount of pure blood already in this country to suffice all requirements and the American draft horse will now have an opportunity to demonstrate its own qualities. For several years the United States has imported from 2500 to 4000 pure blooded animals for breeding purposes, but since the war began, with the exception of a very limited number from England, there have been practically no importations.

## BRYAN SPEAKING IN WESTERN TOWNS

Denver, Colo., Oct. 21.—Secretary of State William J. Bryan entered Colorado today for a two days' speaking trip in behalf of the Democratic state and congressional candidates. His first speech was at Lamar. Later he spoke at La Junta on the way to Colorado Springs, where he was billed to address a meeting at 3:30. His evening program called for an address at Pueblo, where he will spend the night, leaving at 5:30 tomorrow morning for Denver.

Upon his arrival in Denver, the secretary will be given a reception at the Democratic club, after which he will address a noon mass meeting at the city auditorium. Later he will start on a special train for a series of brief addresses at Boulder, Longmont, Loveland, Fort Collins and Greeley.

At 6 o'clock tomorrow evening, Mr. Bryan will leave Greeley for Cheyenne, Wyo.

## UNITED STATES ENTERS PROTEST

Seizure of American Owned  
Tank Steamer by British  
Warship Unwarranted.

Washington, Oct. 21.—The United States has protested to Great Britain against the seizure by a British warship of the American tank steamer "John D. Rockefeller." This was announced today by Acting Secretary Lansing of the state department.

As the Rockefeller was American owned and flew the American flag, and no change of registry was involved, the American government considers the seizure unwarranted. She had American officers and crew. The ship was bound from one neutral port to another, leaving Philadelphia on September 2 for Copenhagen and carried illuminating oil, which Secretary Lansing said had not been classed as contraband in any notification received from Great Britain. The vessel was taken to the Orkney Islands.

Mr. Lansing said that no representations had been made in the case of the steamer Brindilla, taken recently to Halifax, and that he was awaiting further information as to the character of her cargo and the conditions under which she was seized.

As the cargo of the Brindilla was the same as the Rockefeller's, the government's action today was taken to foreshadow another protest and demand for release unless some difficulty in the change of the Brindilla's registry, not yet developed, comes up.

## ANXIETY IS FELT AMONG GERMANS

Copenhagen, Oct. 21, via London, 7 a. m.—The military correspondent of the Berliner Tageblatt hints that there is a certain amount of anxiety about the war situation manifesting itself in Germany. He explains, though, that a decision is likely to come "like a thief in the night," and that it will more probably be on the east front rather than in the west.

"While fresh masses of troops can be brought without hindrance over seas," he says, "they constitute an awkward adversary. Although the unity of their handling—if they invaded Germany is to be doubted, Germany still has a somewhat hard task, which must not be forgotten in waiting for the decision."

Chancellor Bethmann-Hollweg, according to the Tageblatt, is being attacked in certain influential circles as responsible for the war.

**VAST RESOURCES OF THE**  
Probably no other nation in the world so nearly approaches absolute independence in respect to mineral resources as the United States.

A glance at the statistics of mineral imports affords a means of comprehending in a broad way how great and complex is the task of attaining national independence in the mining, metallurgical and chemical industries. Last year the imports of mineral products, both crude and manufactured, exceeded \$279,000,000. Of this total probably \$200,000,000 represents raw materials and crude materials, the value of these imports being about 8 per cent of that of the

domestic output. In this list of imports the larger items named in the order of value are unmanufactured copper, precious stones, nitrate of soda, copper ore and matte, nickel, tin, iron ore, pig iron and steel, petroleum products, manganese ore and alloys, platinum, aluminum, pyrite, graphite, stone, potash and magnesite. This country has an abundant supply of most of these mineral products that are now imported in large amounts, and as to them it can be independent of foreign countries. The only essential minerals of the first rank of which the United States has no known supply at all commensurate with its needs are nitrates, potash salts, tin, nickel and platinum, the list thus comprising two essential mineral fertilizers and three very useful metals.—Geological Survey.
